GARLIC. SILVER. QUESTIONABLE JUDGMENT.

Look closer. The next person in line might be very bad for business.

YOUR NIGHTLY DUTIES

Running a vampire nightclub means checking more than the guest list. In Club Sanguine, you work the door of an occult haven where vampires and their thralls are welcome, but humans, demons, werewolves, zombies and other unwanted visitors keep trying their luck.

Use garlic, silver, holy water, UV light, stethoscopes and X-ray equipment to investigate your guests. Read their reactions, compare the evidence and decide where they belong: inside the club, in the waiting room, at banishment, or somewhere much less inviting. When a shift becomes difficult, there is always the trapdoor.

Beyond the inspections, improve the nightclub, buy equipment and hire staff. Frank handles security with very little subtlety; the mummy cleaner approaches his work with more urgency than anyone expects from the dead.

Developed by Lunitech for Windows PC, Club Sanguine combines supernatural deduction, club management and dark physical comedy. The free demo is live on Steam now.

A NIGHTCLUB WITH A STRICT DOOR POLICY.

And a dangerously flexible definition of hospitality. / Full 350-word description

Welcome to Club Sanguine, a vampire nightclub with an admissions policy and a loose understanding of customer service. You are responsible for the door, the guests, and the consequences of letting the wrong creature into an undead sanctuary. Vampires and their thralls belong here. Everyone else needs a closer look.

Each night begins with preparation. Wake from your coffin, get the club ready, order improvements and equipment, and put your employees to work. Once business begins, suspicious arrivals become your problem. Humans, ghouls, zombies, demons, werewolves and impostors all have their own reasons for wanting an invitation. An appearance is no guarantee that someone belongs on the dance floor.

Your inspection tools make the job possible, if rarely dignified. Test guests with garlic, silver, holy water and UV light. Listen with a stethoscope, consult the X-ray equipment, and watch how visitors respond. Supernatural deduction means bringing those clues together before making a decision. It is a job built around examining the person in front of you, rather than trusting their clothes or their confidence.

Admission is only one possible outcome. Hold a guest in the waiting room while you investigate, direct an unwanted visitor towards banishment, or send a human to the blood room. For especially inconvenient situations, the trapdoor offers a solution with something unpleasant waiting below. Those consequences give an ordinary queue an unreasonable atmosphere.

You have a club to improve and a staff to manage. Frank provides security with an enthusiasm for physical intervention. A frantic mummy cleaner races through his duties. New equipment, furniture and employees turn the establishment into an operation, while the inspections keep its supernatural clientele under scrutiny.

Club Sanguine presents that work through cel-shaded 3D, gothic interiors, exaggerated characters and comic horror. The tone mixes investigation with absurd workplace situations and dark slapstick. This is an occult job simulator where looking after the customers can have a very different meaning after midnight.

Lunitech is developing Club Sanguine for Windows PC on Steam. A free playable demo is available now. The full game is coming soon; its release date has not been announced.
